Engineers Without Borders

August 2014 – Present

- Active member on a growing team, with a project in progress to bring sustainable, clean drinking water to a public school in rural Dominican Republic.

PROJECTS

Band Insider Mobile App: Written for the Android platform, this app allows creating an account to follow music artists from a massive database. We interface with APIs to notify users about new concerts and albums for the artist they follow.

Orbits: A Swift iOS application in which users can reference a database of information about the planets of our solar system, including 3d maps, rise and set times, and external media. All packaged in an easy-to-navigate interface.

SIMG: The Simple IMAge host is a project that does away with all the complexity of hosting an image online. We take the process down to 4 clicks from start to finish. Features a mobile-friendly front-end and a powerful custom back-end.
